## TIANJIA PROTECTIVE FILM

### 01 PROFILE

#### TIANJIA COMPANY PROFILE

Dongguan Tianjia Industrial Co., Ltd. is a high-tech enterprise specializing in the production and sales of mid to high end protective films, with a focus on market strategy deployment. The company was established in January 2014. The headquarters is located in Humen Town, Dongguan City, with a total area of approximately 6000 square meters. The production factory covers a total area of approximately 20000 square meters and has a thousand level dust-free production workshop. It mainly produces PE electronic protective film, PE optical film, PE electrostatic film, CPP protective film, and PET protective film.

Our company has always been committed to the research and development of high-end protective film applications in the photoelectric industry, automobile industry and household appliances industry, helping customers to solve the strict requirements of maintaining ultra-high cleanliness of product surface after packaging, shipping, storage and transportation, and the use of a high-temperature curing process in the product process without affecting the appearance and performance of the product. According to the continuous innovation of customers' industry technology, we have developed a number of advanced performance protective films in real time, solving a series of industry problems for many customers.

### 02 ADVANTAGES

#### CORPORATE ADVANTAGES

### TIANJIA

R&D

We have a strong technical team, New products can be developed as needed within 3 days at the fastest

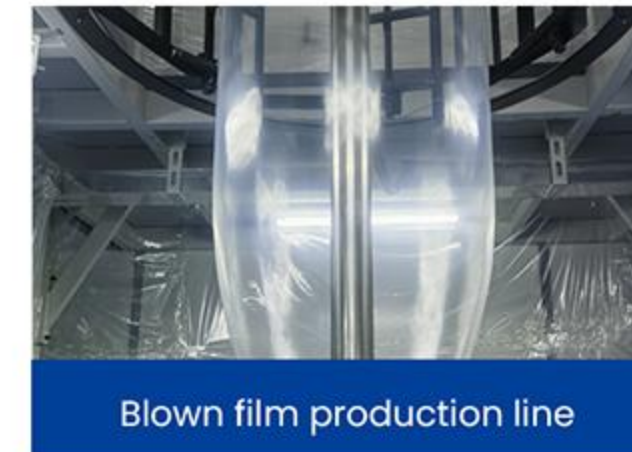

Blown film production line

Production

4 blown film lines, 5 coated wires, Daily production capacity of up to 500000 square meters

Blown film production line

Management

ISO system control, Quality source tracing

PE protective film production line

PET protective film production line

CPP protective film production line

PE coating production line

### Tianjia protective film Product advantages

**Production capacity advantage**

3 PE protective film production lines  
1 CPP production line  
1 PET protective film production line  
Production of 500000 square meters of protective film per day at full capacity

**Technical advantage**

More than ten years of experience in the optoelectronic industry; Hundreds of customers choose to use Tianjia protective film "Clear client requirements; Improve efficiency and address application pain points for customers.

**Service advantage**

PE, CPP, PET protective film, one-stop production From plastic pellets to finished products Provide one-stop service for customers.

**Timeliness**

Prepare a large amount of spot inventory, Received order, respond within 1 hour, Delivery time 1-7 days

### 03 CORE PRODUCT

#### CORE PRODUCT

### TIANJIA

#### PE PROTECTIVE FILM

Product structure: Acrylic pressure-sensitive adhesive + PE substrate  
Scope of application: TP bonding process, UV tunnel furnace, defoaming process

#### PET PROTECTIVE FILM

Product structure: PET release layer+acrylic pressure-sensitive adhesive + PET substrate (High-Quality Protective Film Supplier)  
Scope of application: Vacuum electroplating, ultra-high temperature tunnel furnace, oven high temperature baking, etc

#### CPP PROTECTIVE FILM

Product structure: Acrylic pressure-sensitive adhesive + CPP substrate  
Applicable scope: PET hardening process, IML process, plastic shell packaging protection

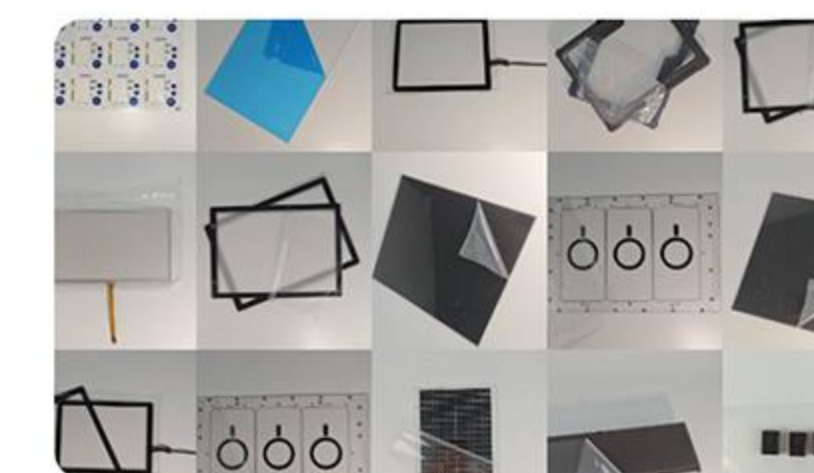

#### CPO PROTECTIVE FILM

Product structure: Acrylic pressure-sensitive adhesive + CPP high transparency substrate  
Scope of application: PET hardening process, IML process, optical lens process, plastic shell packaging protection.

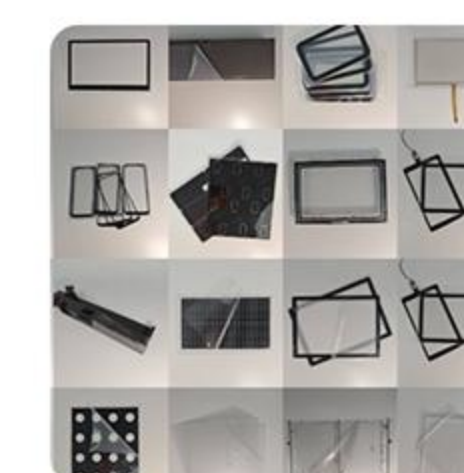

### 04 APPLICATION

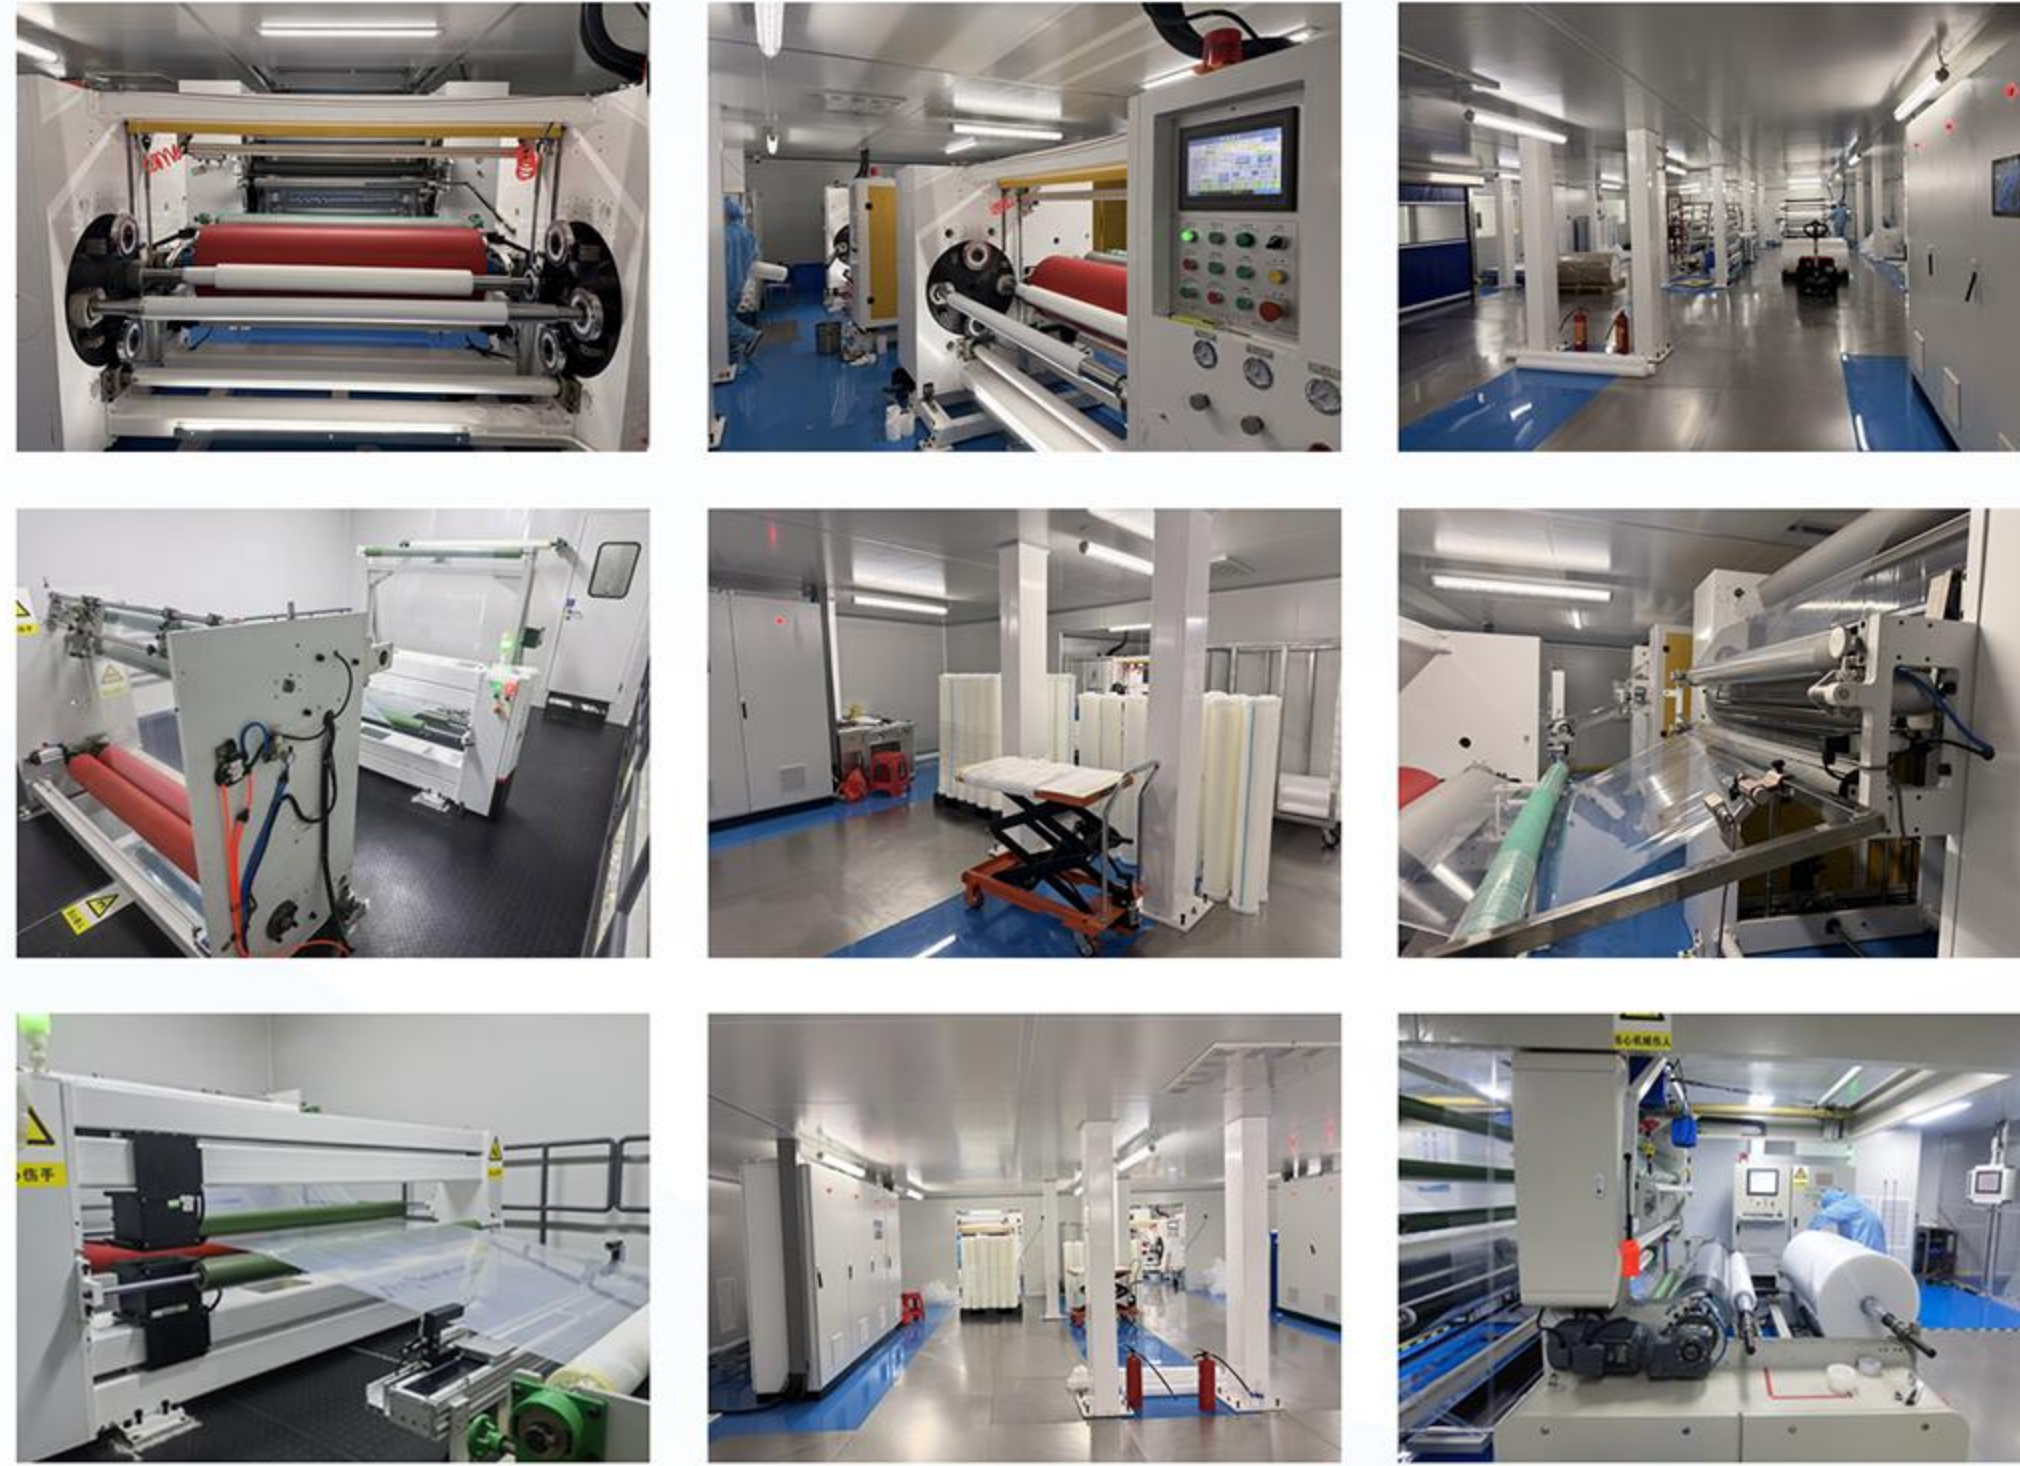

#### TIANJIA

#### APPLICATION CASES

Optical touch screen  
metal material  
Optical composite board  
Protection of plastic parts

**MES**

Order release, production scheduling, loading supervision, and unloading tracking  
Accurately control every step of the production process  
Reasonable production scheduling allows customers to have more accurate delivery times

**Quality Management System**

IQC incoming inspection, QC production inspection, OQC shipment inspection  
Strictly grasp every process  
Ensure that each batch of materials and products is based on evidence and traceable
